SCENARIO

Scenario: The expectation is to imagine, that even though you can't see crews, smoke, and fire, resources are arriving at 1700 hours on Day 1. The need is a camp where they can be parked, supplied, fed, watered, and a place to sleep.

Fire Name: Centennial

Camp Location: Centennial Job Corps

Situation: ICT3 was ordered to take command of the Centennial Fire. A camp crew was ordered the previous night by the ICT4.

Resources in Camp:

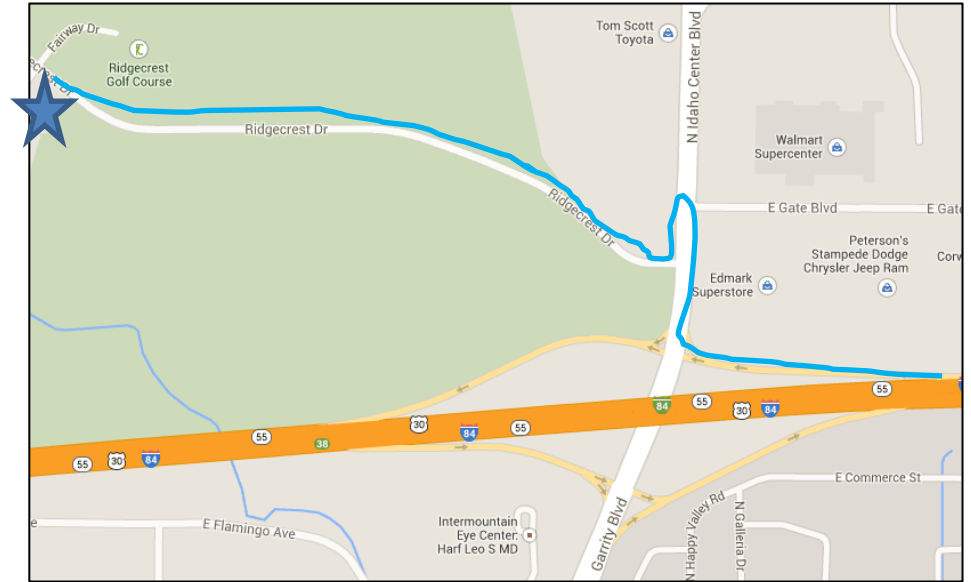

- Centennial Job Corps Camp Crew w/Crew Boss
- Yurts

Objectives: The ICT3 and ICT3 (t) will build a Type 3 organization (logistics only) using the resources that are listed.

****The ICT3 will stay logistics focused and not get side tracked towards operations of the fire****
